RIBCRAFT MIDDLE EAST

WELCOME TO RIBCRAFT PROFESSIONAL RANGE OF RIGID INFLATABLE BOATS

GLOBAL PRESENCE

Founded in Great Britain over 30 years ago, RIBCRAFT has gained a world-class reputation as a leading global builder of custom and production Rigid Inflatable Boats with manufacturing facilities in the United Kingdom, United States of America and United Arab Emirates, Middle East.

IN-HOUSE DESIGN & CONSTRUCTION

Ribcraft is unique as a global manufacturer in that all designs and construction for the entire craft are built in-house at purpose built facilities. This ensures that every Ribcraft RIB is built to the highest standards. The company places great emphasis on safety, durability and quality of construction and has cemented this reputation over the past three decades.

UNIQUE DESIGN, CONSTRUCTION & FLEXIBILITY

Ribcraft is keen to accommodate individual requirements and has a flexible approach when dealing with professional, commercial and military clients. Our boats are designed in Great Britain and manufactured in United Arab Emirates at purpose built facilities. With a host of colour options, layouts, consoles, seating configurations and engine choices, each boat is a unique project.

RIBCRAFT MIDDLE EAST

Located in the heart of Dubai Maritime City, RIBCRAFT Middle East has the capabilities to design and manufacture the complete RIB, with hull sizes from 3.5m to 12.5m. Our RIBs are designed to perform in the most inclement of conditions. Functionally simple and technologically advanced, everything about a Ribcraft RIB is professional grade.

ribcraft

UNMATCHED CRAFTSMANSHIP AND PERFORMANCE

From classic open boats, to fully enclosed cabins, each Ribcraft RIB is a unique project based on custom requirements and built at exceptional standards using only the finest materials.

Ribcraft's strong team of Naval Architects, Technical and Marine Engineers assures that the highest standards are met at every stage of design and construction without compromise.

STAGE 1

VISION AND CHOICE

Ribcraft is keen to accommodate individual requirements and have a flexible approach when dealing with professional, commercial and military applications. Each RIB is a unique project; it is up to the client how the final boat looks, with choice of colours, layouts, consoles, seating configurations and power options. Ribcraft will help you choose the right boat to meet your requirements.

STAGE 2

DESIGN

At the design stage, Ribcraft CAD engineers work closely with the production team to ensure that designs meet the appropriate technical and legal requirements, by preparing 2D and 3D drawings from exterior and interior layout to systems installations.

It is our role to represent the clients vision and interests throughout the project from concept to delivery. We consult the client closely during design in order to ensure the final product meets requirements and exceeds expectations.

STAGE 3

CONSTRUCTION

Throughout the construction phase, our team of experts will advise on scheduling, supervise the build, accompany clients on site visits and provide regular progress reports.

CONSTRUCTION | HULL ▶ TRANSOM ▶ UNDER DECK STRUCTURE ▶ DECK ▶ CONSOLE AND SEATING

**ASSEMBLY | STAINLESS STEEL STRUCTURES
▶ INFLATABLE COLLAR ▶ ACCESSORIES ▶ ENGINE & ELECTRONICS**

HULL CONSTRUCTION

Ribcraft hulls are commercial strength Glass Reinforced Plastic (G.R.P.), formed from highly polished tooling moulds. Lloyds Approved chop strand mat and roving cloths are laminated into position by Ribcraft's highly skilled teams.

All stages of construction are closely monitored to ensure correct humidity and temperature resulting in even curing and an immensely strong blister free hull.

An advanced cross linked inner matrix is installed using the latest honeycomb composite materials, providing a lightweight and robust support system which gives structural integrity and provides weight reduction. This matrix also provides additional structure for the installation of the fuel tanks and service ducting. The internal chambers are treated with a gel coat to prevent delamination and provide an extended lifespan and enhanced internal waterproofing. Deck and internal mouldings are bonded into place along with deck finishing prior to attachment of the inflatable collar.

CONSOLE AND SEATING

Ribcraft consoles and seats are designed and manufactured to be practical, ergonomic and user friendly. These are constructed by using the latest composite moulding techniques. This process ensures the highest possible level of strength and finish.

All options can be tailored to individual requirements and professionally fitted to the highest standards by Ribcraft's factory-trained technicians. Ribcraft can design and install special equipment such as fully immersion proof electrics as seen on lifeboat specification boats and self-righting systems for serious professional or military applications.

INFLATABLE COLLAR

Ribcraft are one of the few manufacturers to make their own Inflatable Collars, providing full quality control and customization for leisure, professional or robust military applications. These are hand made to an individual application by Ribcraft experts in the UK, airfreighted and installed in our facility in Dubai Maritime City. The finished tubes are pressure tested to International standards before installation.

Buoyancy tubes are constructed using Hypalon®, the leading material in the industry. As the only proven and time-tested material, Hypalon® has incredible resistance to abrasions, chemicals such as fuel oils, mechanical stresses, UV damage, and extreme temperatures. Furthermore, Hypalon® is easily repaired even after years of service.

ENGINE PACKAGE

Ribcraft is able to supply a variety of engine packages including:

- Outboard Engines (Petrol & Diesel)
- Inboard Engines (Petrol & Diesel)
- Jet Drives

STAGE 4

TESTING AND SEA TRIALS

Sea trials are an essential and thrilling phase in the development of a custom built RIB. They provide the designers, builders and technical team with an opportunity to fine tune the boat's systems, and to iron out any 'snagging' issues.

STAGE 5

DELIVERY & WARRANTY

Each project comes with sizeable package of warranty documentation and user manuals. These cover every major component, system and item of equipment, from boat's engines to electronic equipment and tubes.

RIBCRAFT

WHY US?

1

SAFETY

Long considered one of the safest ways of transporting people and equipment, RIBCRAFT RIBs offer unparalleled performance and safety by incorporating a conventional solid fiberglass hull with an inflatable tube for increased buoyancy, stability, and overall performance.

2

PERFORMANCE

Designed with professionals in mind, a RIBCRAFT RIB with its aggressive deep V hull and heavy-duty Hypalon tube delivers a more responsive, stable, smooth and dry ride in rough offshore conditions than hard sided boats.

FAQs

Functionally simple and technologically advanced, everything about a RIBCRAFT RIB is professional grade.

RIBCRAFT
middle east

RIBCRAFT builds every boat to perform in the most inclement of conditions. 'Challenging the Elements'.

RIBCRAFT's trademark deep V hull, full length lifting strakes, and pronounced bow sheer combine with a multi-chambered heavy-duty Hypalon® tube to deliver unsurpassed performance, stability, buoyancy and an unrivaled dry ride.

All of this delivers the essential rough weather handling you demand to get you to your destination safely and comfortably. Open clutter free decks,

oversized handholds, seating designed to provide optimal support and safety, and console configurations to put controls electronics, and communication equipment easily at your fingertips allow you to concentrate at the job at hand and not on the boat.

Strength, stability and performance are at the heart of every RIB we build, this is why Ribcraft offers complete packages including engine, electrical/ electronic system, trailers and stainless steel fabrication.

Ultra-performant commercial Rigid Inflatable Boats, ideal for the dedicated professional, easily coping with the endurance demands of heavy commercial usage.

Ideal for carrying people and equipment with confidence. Built for Comfort, Speed and Reliability.

Tested to extremes.

3

MISSION SPECIFIC

At RIBCRAFT we understand each owner, agency, department, and organization has its own unique set of needs and requirements. As such, every boat is built to order. With a host of options, seating configurations, and engine choices, every boat is built for the mission as opposed to tailoring the mission to the boat.

4

PROFESSIONAL GRADE

Designed with professionals in mind and built to the highest commercial standards, RIBCRAFT places great emphasis on durability and quality craftsmanship of each and every boat. With multi-chambered Hypalon tubes, reinforced hulls and pressure relief valves, RIBCRAFT RIBs are built for 24/7 commercial use.

5

CUSTOMER SERVICE

RIBCRAFT prides itself on working closely with the customer to understand their specific requirements. You need your boat to be 100% whenever you are called to the water, that's why we are committed to our customers throughout the life of the vessel always ready to assist with any service needs.

RIBCRAFT

middle east

Whether meeting the emergent requirements of military and government agencies around the world or delivering a thrilling and exhilarating experience for passengers and tour operators alike, a RIBCRAFT RIB offers unparalleled performance, reliability, and safety.

3.5^{PRO}

Incorporating the qualities of exceptional safety, design, and reliability, the 3.5 planes with ease, is very easy to manoeuvre and provides a smooth stable ride.

The 3.5 features a solid commercial fiberglass hull, a molded non-skid deck or SeaDek, and Hypalon® tube with multiple chambers and pressure relief valves.

Designed as a complete all-rounder the Ribcraft 3.5 can be adapted to any application. Whether you are looking for the perfect yacht tender or a comfortable runabout that is fun to drive, the Ricraft 3.5 has you covered.

Premium features include include custom SeaDek, high-end stereo system and bespoke seating upholstery.

Overall length: 3.5 (Meters)	Overall beam: 1.7 (Meters)	Internal length: 2.0 (Meters)	Internal beam: 0.96 (Meters)	Weight 200 (KG): (Excluding engine)
Tube diameter: 380(MM)	Chambers in tube: 3	Min horsepower: 15	Max horsepower: 60	Max no people: 4

PROFESSIONAL RANGE: 3.5 M

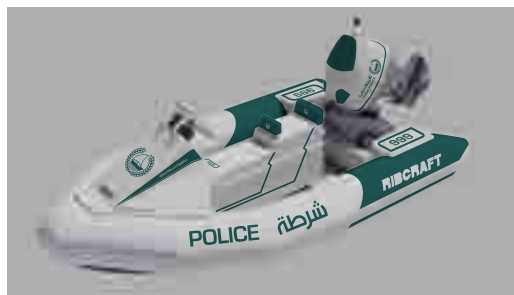

Compact, stylish and sporty handling, Ribcraft 3.5 is designed as a complete all-rounder that can be adapted to any application.

STANDARD EQUIPMENT

- Single seat console with attached pod seat and storage
- Internal/external fuel tank
- Upholstered backrest
- Heavy duty steering with wheel
- 1670 dtx Hypalon® tube with five (3) chambers
- Pressure relief valves
- External lifelines
- Heavy duty rubstrake
- Stainless steel bow eye
- Anchor locker
- Stainless steel transom tie down eyes
- Battery with retainer and switch
- Electrical panel
- Navigation lights
- Electric bilge pump
- Underdeck wire conduit
- Light grey gelcoat
- Foot pump
- Molded non-skid deck

OPTIONAL EQUIPMENT

- Antenna arch
- Stainless steel lifting points
- Reinforced tow eyes for towing
- Keelguard
- Boarding wear patches
- Tube grab handles
- Paddle/hook retainers
- Custom Hypalon® lettering
- SeaDek
- Electronics packages
- Hydraulic steering
- Complete engine packages
- Various hull & tube colours

4.8^{PRO}

Designed as a complete all-rounder the Ribcraft 4.8 can be adapted to any application. The Ribcraft 4.8 design incorporates the qualities of safety, strength, stability, speed and comfort. Her high sheer bow and classic deep V hull gives exceptional stability in rough weather whilst keeping the bow high in swells and heavy chop.

The hull characteristics and rugged construction are ideally suited for anything from a family leisure boat used for water-skiing to a serious rough water rescue craft. The Ribcraft 4.8 range is used for many different applications all over the world including water-sports, diving, family cruising, commercial use, safety and rescue.

The 4.8 features a solid commercial fiberglass hull, a molded non-skid deck, and heavy-duty Hypalon® tube with multiple chambers and pressure relief valves.

Overall length: 4.8 (Meters)	Overall beam: 2.1 (Meters)	Internal length: 3.9 (Meters)	Internal beam: 1.2 (Meters)	Weight 275 (KG): (Excluding engine)
Tube diameter: 460(MM)	Chambers in tube: 5	Min horsepower: 25	Max horsepower: 70	Max no people: 6

PROFESSIONAL RANGE: 4.8 M

The Ribcraft 4.8 design incorporates the qualities of exceptional safety, strength, stability, speed and comfort.

STANDARD EQUIPMENT

- Single seat console with attached pod seat
- Upholstered backrest
- Stainless steel console grab rail
- Heavy duty no-feedback steering with wheel
- 1670 dtx Hypalon® tube with five (5) chambers
- 60 liters internal fuel tank
- Pressure relief valves
- External lifelines
- Heavy duty rubstrake
- Stainless steel bow eye
- Anchor locker
- Stainless steel bow cleat
- Stainless steel transom tie down eyes
- Battery with retainer and switch
- Electrical panel
- Navigation lights
- Electric bilge pump
- Underdeck wire conduit
- Light grey gelcoat
- Foot pump
- Molded non-skid deck

OPTIONAL EQUIPMENT

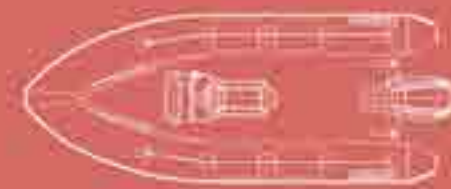

- Additional pod seats with Upholstered backrest and grab handle
- Two person bench seat
- Antenna arch
- Tow post
- Stainless steel lifting points
- Reinforced tow eyes for towing
- Folding bimini
- Keelguard

5.85^{PRO}

The 5.85 is a true offshore Rib capable of handling the most inhospitable sea conditions, her high sheer bow, deep V hull and full length spray rails give exceptional stability in rough weather whilst keeping the bow high in swells and heavy chop.

Performance

The Ribcraft 5.85 superior handling characteristics enable her to be powered by engines up to 150HP, giving a breathtaking performance. For normal usage engines between 90HP to 115HP will suffice, please talk to Ribcraft for advice on selecting the correct power unit for your application.

The Interior

Ribcraft 5.85 has a large deck space with room for any application. Control cables are routed below deck keeping them from harms way and giving a totally clear deck. There is a host of accessories available; consoles, seating, propulsion and power options. The boat can therefore be customised to specific individual requirements whatever the application.

Overall length: 5.85 (Meters)	Overall beam: 2.4 (Meters)	Internal length: 4.8 (Meters)	Internal beam: 1.5 (Meters)	Weight 580 (KG): (Excluding engine)
Tube diameter: 500(MM)	Chambers in tube: 5	Min horsepower: 60	Max horsepower: 150	Max no people: 12

PROFESSIONAL RANGE: 5.85 M

The most relied on boat in the RIBCRAFT model line for government agencies, private industry, watersports operations and yacht clubs.

STANDARD EQUIPMENT

- Center console with front bench seat and two side by side pod seats or leaning post
- Stainless steel console grab rail

6.8^{PRO}

Ribcraft 6.8 is designed as a commercial foul weather boat and has proven herself in this field.

Even in inhospitable sea conditions worldwide the Ribcraft 6.8 will transport you with confidence. With a long steep sheer towards the bow and a generous 2.7 metre overall beam, they are true workhorses of the sea. Ribcraft 6.8 can be customised to your individual specification whether military, commercial or rescue usage. The craft is capable of taking a wide range of power options which include outboard, stern drive or water jet.

Exported all over the world to a diverse spectrum of operators such as French lifeboat stations, Oil terminals, Fast Rescue Craft on the Nile and Swiss Lakes, the Ribcraft 6.8 is a true pedigree Rigid Inflatable Boat.

The Construction

Ribcraft 6.8 has a cross linked inner matrix hull construction, making her incredibly strong. The 6.8 is capable of extended long distance cruising, her fuel tanks are located under-deck, maximising the console space and lowering the centre of gravity thus improving trim and handling.

Overall length: 6.8 (Meters)	Overall beam: 2.7 (Meters)	Internal length: 5.4 (Meters)	Internal beam: 1.7 (Meters)	Weight: DOSPEC
Tube diameter: 530(MM)	Chambers in tube: 7	Min horsepower: 125	Max horsepower: 200	Max no people: 14

PROFESSIONAL RANGE: 6.8 M

Ribcraft 6.8 provides increased load which makes her an excellent all-purpose boat for rescue applications, patrol work and tour operations.

STANDARD EQUIPMENT

- Center console with front bench seat and two side by side pod seats or leaning post

9.0^{PRO}

The Construction

The Ribcraft 9.0 answers the call of the serious offshore user with unparalleled handling characteristics and flexibility in design. Used by a variety of professionals, from military & law enforcement agencies, to tour operators and commercial organizations, the Ribcraft 9.0 provides generous deck space for people and equipment. With endless accessories and deck configurations ranging from a simple center console, to twelve individual pod seats or a fully enclosed pilot house, the RIBCRAFT 9.0 accommodates any application.

With a classic high sheer bow and convex warped hull to her generous 3.0 metre beam, this boat is the answer for the serious offshore user. Ribcraft 9.0 Offshore will carry crew, payload or passengers over long distances maintaining respectable speeds whatever the conditions. She is the ideal choice for the dedicated professional and can be customised to individual specifications whatever the intended usage. Propelled by either outboard or inboard engines, she gives a sparkling performance and her responsive handling makes her a pleasure to helm in any sea state.

10.5^{PRO}

Ribcraft 10.5 delivers the ultimate offshore response. By combining Ribcraft's signature deep V hull and bow sheer with an extended waterline and generous beam this model makes easy work of virtually any sea condition. Designed for extended passages and operations requiring large payload capacities, the 10.5 offers incredible design flexibility. From a simple center console for optimal work space to multiple seating arrangements for crew and passenger transport to cabin arrangements for all weather protection or overnight accommodations, this flagship model answers the needs of virtually any application. Depending on speed and load requirements, the 10.5 offers the choice of twin or triple outboards or twin diesel sterndrives or jets.

The Construction

Ribcraft 10.5 has an cross linked inner matrix construction making her incredibly strong; the layout is to commercial specification. The tubes are bonded to the hull over an extended tube flange that gives them far superior bonding strength between tube and hull than conventional flanges. The end product is an immensely strong hull and tube that meets M.C.A. approval.

Overall length: 10.5 (Meters)	Overall beam: 3.5 (Meters)	Internal length: 9.5 (Meters)	Internal beam: 2.5 (Meters)	Weight: DOSPEC
Tube diameter: 550(MM)	Chambers in tube: 9	Min horsepower: 200	Max horsepower: 600	Max no people: 16

[FAQs](#)

Ribcraft has been designing and manufacturing offshore commercial Rigid Inflatable Boats since the late 1980's. We supply commercial organisations that demand an extremely versatile “working platform” in which they can entrust their lives and equipment in the most inhospitable sea conditions encountered worldwide.

THE WHEELHOUSE

We have our standard off the shelf wheelhouses which are constructed using glass reinforced plastic (GRP).

These versions have set external dimensions, then customised to your specific requirements, colour, interior layout etc.

Ribcraft can additionally manufacture custom built wheelhouses for bespoke client requirements. These can be manufactured from GRP or alternatively an aluminum superstructure.

FITTINGS

Windows and doors are custom manufactured to the client's specification; we supply light duty versions for inshore work boats and reinforced 'sea glaze' versions for all weather self righting versions.

Interior fittings are client specific, from heating and air conditioning to electronics and toilet.

DESIGN

We design our Wheelhouse Boats 'In House' using the latest 3D CAD software. The vessel is designed and tailored to your individual requirements and we ensure that the final outcome is a well designed vessel that is comfortable and safe whilst the crew carry out their day to day duties.

MADE IN UAE

| ribcraftme.com

WHERE ARE THEY MADE?

Ribcraft is unique as a global manufacturer in that all designs and construction for the entire craft are 'In-House'. Our boats are custom-built in Dubai Maritime City to UK specifications. The hull, GRP structures, fuel tanks and stainless steel components are manufactured at our purpose built facility in Dubai Maritime City. The inflatable tubes are built in the United Kingdom, airfreighted and installed at our facility in Dubai.

HOW DO I CHOOSE THE SPECIFICATION I NEED?

You can download our price list from our website www.ribcraftme.com or alternatively email your requirements to hello@ribcraftme.com. Additionally please call us on +971 4 442 6379; further to our conversation we can draft a personalised quotation. Our standard price list online will also give you some basic guidance on our most popular engines, options and layouts.

WHICH MODEL?

All of our Professional range of hulls can be adapted to any application, first and foremost all Ribcraft hulls are designed as good strong sea boats, there is no difference in hull construction whether used for leisure or commercial. Serious leisure use on a hull can be just as demanding as commercial usage. The Professional range of boats are individually

customised to client requirements; layouts, consoles and extras can be specified to exacting specifications.

I AM A COMMERCIAL OPERATOR, WHAT ABOUT CERTIFICATION?

All Ribcraft models from 3.5 metre to 12.5 metre are MCA (Maritime and Coastguard Agency) type approved. This means that the boat has already passed the relevant buoyancy, stability and approved build standards. You will need to have the relevant safety equipment on board and after inspection by the appointed MCA representative a license can be issued. For more information, please contact Ribcraft representatives.

HOW LONG WILL IT TAKE FOR MY BOAT TO BE BUILT?

Depending on the specification the lead time will vary between 4 – 12 weeks for custom built boats. With standard models we hold limited stock which may be available sooner.

WHAT MATERIALS DO WE USE TO BUILT THE BOATS AND TUBES?

We use reinforced fiberglass and honeycomb material for the hull and deck. The tubes are built

with heavy duty Hypalon used by Navy and Military around the world.

AFTER SALES SERVICES / SUPPORT?

As complete manufacturers, Ribcraft offers after sales support and provides full repair services with genuine parts and accessories at our facility in Dubai Maritime City.

WHAT OTHER PRODUCTS AND SERVICES DOES RIBCRAFT PROVIDE?

Ribcraft not only manufactures Professional Grade RIB's but also provides full maintenance services from repairs to complete refurbishment of existing RIB's. We also manufacture high-quality, custom-made dock boxes built with reinforced fiberglass, UV gelcoat and stainless steel latches.

WHAT ARE THE ENGINE OPTIONS PROVIDED?

We provide both Petrol and Diesel solutions in Outboard and Inboard configurations. Engine brands include Suzuki, Yamaha, Honda, Mercury, Yanmar, Volvo Penta and Mercruiser.
